Mercedes Vito Warning Lights

Mercedes ESP Warning Light

The ESP (Electronic Stability Program) dashboard warning light on the Mercedes Vito indicates that ESP or traction control has intervened to help stabilise the car. If the light stays illuminated, ESP has malfunctioned.

How to Reset a Mercedes Vito Service Message

To reset the service message on a Mercedes Vito, you can follow these steps:

1. Turn the ignition to the ON position without starting the engine.
2. Press and hold the two buttons on the dashboard simultaneously until the service message is reset.

Mercedes Yellow Warning Light

A yellow warning light in your Mercedes Vito may indicate a malfunction in the charging system. Do not assume that the battery needs to be replaced.

Mercedes-Benz Vito W639 Front Brake Pad Sensor Replacement

The brake caliper on the driver's side of the Mercedes Vito W639 was giving trouble, sticking badly and eventually causing the brake pad warning sensor on the dash to illuminate.

Brake Light Switch

A brake light switch may cause the ABS ESP warning light to come on. It is the most common problem with Mercedes-Benz cars, particularly familiar with models such as E 320, C 240, SLK, CLK, and several other Mercedes-Benz chassis.

Mercedes-Benz 2010 Sprinter EDC Light

The EDC light on a 2010 Sprinter van can turn on if the power to the van is cut off, even while the key is in the ignition. If the problem persists, it may be necessary to factory reset the EDC module using a jumper wire or similar technique as outlined in the service manual.

Turning the Brake Warning Light Off

To turn the brake warning light off after the pads have been changed, you can follow these steps:

1. Ensure the pads are correctly installed and the caliper is securely clamped.
2. Restart the engine and check that the brake warning light is off.
3. If the light remains on, check the wiring connections and caliper operation.

If the problem persists, it may be necessary to factory reset the EDC module using a jumper wire or similar technique as outlined in the service manual.

Mercedes-Benz Vito W639 639 mk2 Battery Warning Light

The battery symbol in your Mercedes Vito Viano indicates a malfunction in the charging system. Do not assume that the battery needs to be replaced.

Mercedes-Benz C180 Service Indicator Warning

To reset the service indicator warning on a Mercedes C180 after having it serviced, you can follow these steps:

1. Connect the scanner to the OBD-II diagnostic port.
2. Select the service indicator reset option.
3. Follow the prompts on the scanner to reset the service indicator.
4. Close the service indicator reset menu.

Mercedes-Benz Vito EDC Light

The EDC light on a Mercedes Vito can be reset by following these steps:

1. Connect the scanner to the OBD-II diagnostic port.
2. Select the EDC reset option.
3. Follow the prompts on the scanner to reset the EDC.
4. Close the EDC reset menu.

Mercedes-Benz Vito Viano Gear Selector Cable Install Adjustment Documentation

If you unplug the emulator, the passenger airbag light remains off but the srs warning light on the dash remains on. This suggests an ongoing problem and being in France doesn’t help. The scanner will identify that the passenger airbag light is off, but the srs warning light on the dash remains on. This is a common problem with Mercedes-Benz cars and can be resolved by following the factory reset procedure.
off after the pads have been changed on a mercedes vito 111 posted by lcdavidson, i only found this out when i had no option but to get a diagnostic done at an independant merc repairer for another fault i d decided to live with the warning light and no cruise control and it showed a faulty switch i couldn t understand it as my lights were working fine but the guy explained the dual switch thing so i changed it and, i have found that the esp asr warning lights are on and i cant seem to turn off the asr light could this be the reason i have limited power and if so what can i do about it i dont really want to take it to mercedes because i have already paid out a small fortune and i know mercedes will charge me a ridiculous price to take a look and diagnose, reset engine management light on mercedes vito how do you reset engine management warning light just had i have a 2005 chevy cobalt and my check engine light came on so i hooked the scanner up to my car and it said for me to reset the check engine light so i did and a few days later the check engine light, subject w639 vito abs and traction control warning lights mon sep 09 2013 12 16 pm i have an 04 vito 639 it failed it s mot because of the abs and traction control lights being on the garage told me it had a wiring problem and needed an auto electrician i immediately panicked, mercedes c class w203 w204 esp light esp light on a c class is typically caused by a defective brake light switch or low battery voltage mercedes benz ml class w163 w164 w166 a common problem that causes the esp light to come on in mercedes benz ml models is the abs pump brake light switch is also a common problem in this model too, mercedes vito light relay vito an 112cdi 2001 headlight prob vito glowplug issue nottinghamshire garage
