two were used for the trolling motor and they put the other one in as the starting battery i didn t think much of it but i got to reading the paperwork that came with the boat and there s a warning card that says the optimax should only be rigged with a marine starting battery not a deep cycle with 800 or 1000 marine cranking amps, the 75 hp mercury outboard will need a starting battery in the 650 cca range although up to 1000 cca would work just fine go science math history literature technology health law business all, help with mercury outboard 40hp 2 stroke dies shortly after starting or lowering chok 4 old mercury 900 90hp outboard assessing and starting it for the first time in 10yrs, installation manual 200 225 250 optimax the remote control connected to the outboard must be equipped with a start in gear protection device this prevents the engine from starting in gear mercury mariner outboards battery cable length 8 ft 2 4m 9 ft 2 7m 10ft 3 0m 11ft 3 4m 12ft 3 7m 13ft 4 0m 14ft 4 3m 15ft 4 6m 16ft, starting marine and boat batteries work best when the charge is maintained in the battery do not store the battery in a discharged state use a top quality marine battery charger we even offer battery boxes rescue packs and portable power for running accessories and custom cables to make sure your boat battery is running at top speed, outboard battery requirements for yamaha traditional speed boat engines use a battery to kick start the engine and power boat accessories a yamaha two stroke engine with a 50 or below horsepower uses a battery that contains 245 cold cranking amps at zero degrees fahrenheit and 323 marine ranking amps at 32 degrees fahrenheit, the marine cranking amp mca or just cranking amp ca rating found on a battery s label measures a battery s starting power and if you re using a newer model outboard with sophisticated computers pumps and sensors that don t take kindly to being underpowered you certainly don t want to scrimp on starting power, 90hp 2 stroke mercury outboard my battery has been getting weak yesterday after running the boat all day i wanted to flush the engine when we got home i went to start it and it just makes a clicking sound at the electrical box in the motor i replaced the battery today and it still just does the same thing, you get ample maintenance free power for starting and accessories in your 2009 mercury mariner vibration resistance and a spill proof case with our replacement batteries, converting your outboard s unregulated
charging system folks may also be familiar with having to add water to their batteries quite often or they may be upset with reduced battery life on maintenance free or sealed batteries without any type of voltage regulation excess charging current raises the battery voltage above 14.8 volts, mercury outboards are one of the most popular outboards on the water they are dependable powerful and relatively quiet they make high quality high performance one and two stroke engines however they don't always fire right up when you try to start them there's a few things you need to know before, for sale is a set of new battery cables for a johnson or evinrude outboard motor part number 176455 about 6 ft long this is a light guage cable for charging the battery not starting it, the battery is a source as long as it has a charge right the motor is a source only when its running and it only puts out a handful of amps the battery can dump hundreds of amps instantly and where is a short most likely to happen across the battery poles or in the outboard wiring imagine a following swell swamping the motor, 2017 mercury 25 hp el 4 stroke innovating the industry with battery free power mercury fourstrokes have long led the pack in clean quiet fuel efficient outboard power and now the gap grows even wider, i have a 40 hp mariner outboard 1999 which is not starting and not cranking battery seems to be well charged motor answered by a verified marine mechanic, how to select a marine battery by tom burden last updated 2 15 2019 types of batteries batteries on your boat handle two basic kinds of tasks starting an engine and running electrical loads like lights electronics and accessories for longer time periods, what to do if your outboard won't start by john tiger photos by mark corke step by step troubleshooting will help you pinpoint problems while outboards have become more and more complex they still operate on much the same principles as they did before the current wave of efi dfi and four stroke technology to start and run an outboard needs, maintenance verado engine battery specifications important verado engines require a 12 volt agm absorbed glass mat marine starting battery that meets the minimum ratings for best performance mercury marine does not recommend using the more common flooded wet cell or gel cell type lead acid batteries for starting verado engines, mercury diesel mercury diesel engines offer a sophisticated diesel engine experience advanced turbocharging and injection technologies produce a powerband thats carefully calibrated for marine performance and outstanding economy, page 7 battery cable connections 30 40 hp 2 cyl manual start models battery cable connections using quicksilver 2000 series side mount remote control single outboard 1 route the remote control harness a around the back of the engine block
as shown, I need a new battery for a 1995 Mercury 40hp. I will not be using a trolling motor, so see no reason to buy a deep cycle. In fact, I don't see a reason to have a marine battery, but I am no rocket scientist. Seems to me I can buy the cheapest 12v car battery that Walmart or Auto Zone offers and I should be good to go. Best answer: You should get a marine group 24 battery. This is not a deep cycle. It's just a normal starting battery. They are available at Sears and Walmart or most any marine dealer. If you have a trolling motor, you need a deep cycle group 27 for it. Don't try to get dual use out of them. If your engine has a battery, make sure it is charged up before use. Verify the battery connections are clean; corroded connections can keep a Mercury outboard from starting, stalling, power loss, and excessive vibration. Outboard motors require that you start them up and hold the gas until they can idle on their own.

Page 18 200 225 250 275: Verado 4 stroke note on multiple installations: The automatic battery switch ABS 87 895091K01 must be used to connect all outboard starting batteries to the power steering pump. The ABS allows battery voltage to be drawn from the starting battery with the highest state of charge. Starting BCI group 31M marine and boat batteries from Batteries Plus Bulbs. Deep cycle, dual purpose, and starting batteries for boats of all sizes. High performance AGM available.

I have a 2003 Mercury outboard boat motor that needs a new battery. The old one was way too big for it, and I was wondering what the correct one was or what would work. The model number is EL25. No trolling motor or radio will be used on this battery; just enough to start and run the motor. Thanks for the help.

Order Mercury Mariner battery online today. Free same day store pickup. Check out free battery charging and engine diagnostic testing while you are in store.

Jun 14 2010 battery ratings: Note these are minimum engine specifications. Additional electrical loads from the boat will require larger batteries. Mercury Marine two years limited warranty Europe. What is covered? Mercury Marine warrants each new Mercury outboard, Mariner outboard jet products, thruster, electric trolling motors, Mercruiser inboard or sterndrive engine products to be free of defects in material and workmanship during the period described below.

Never thought about that chief. My Optimax requires 1000 amp starting battery, and I also have a deep cycle on the boat. Both batteries start equally well after two years but that's in Florida with temps above 70 degrees. I am going to look into the farm battery idea. I guess size 24. Quicksilver Marine parts catalog contents: Pre 1988 Mariner spark plugs. 2 stroke Quicksilver battery.
