Hit a stump now speedometer doesn't work Boat Talk
December 20th, 2020 - I highly suspect that when you hit the stump you clogged the speedo pickup on the leading edge of the lower unit. Locate the small 1/8 hole on the leading edge of the lower unit and then using an 1/8 drill bit gently insert and clear out the hole using your hand to turn the bit in the hole.

How to Fix the Speedometer Hole on a Mercury Outboard
January 5th, 2021 - In most cases, the speedometer works by implementing water and air pressure. As you sail, water is forced into a small hole either in the pitot pick up or in the lower unit of the motor. The water forces the air in the tube to compress and moves the needle to show your speed.
