avoid a constant drain and because i only need to take the occasional
snapshot the circuit will need to be switchable can anyone suggest a suitable
circuit please, re volt meter wiring you don t use the s terminal gauges are
manufactured using the same rear housing and meter movement only the gauge
face calibrations change so there is no need in spending extra money for a
separate mold to make a housing without a s terminal all you need is the
light ground and i or power connection, here s a very simple do it yourself
project with useful benefits such as detecting or preventing a power problem
on your boat most boats have 12 volt electrical systems powered by one or
more batteries that are recharged by the engine s alternator or other
electrical sources such as solar panels or a wind generator if you don t
already have a voltmeter wired into your system to keep you, hour meters are
used in boats to keep track of the boat engine s run time this is important
information because most boat engines have regularly scheduled maintenance
schedules measured in engine hours hour meters are typically wired directly
into some part of the boat that receives power only when the engine is on,

the boat and to make sure that there is power in the system by no means,
wiring and terminations are the means to get power delivered to the various
bits of electrical equipment we install on our boats as a matter of fact
those of us with many years of experience in these matters will always tell
you that the vast majority of problems with electrical systems occur at
termination points, how to wire a marine hour meter if this is the case with
your boat adding an hour meter will ensure that you are able to maintain your
boat s power plant on schedule plan the job mounting the hour meter near the
ignition switch will facilitate the wiring job later, while an hour meter
isnt a necessary part for your boat it can help you track how many hours you
put on your outboard motor although newer engines often come with display
gauges older ones leave you in the dark install an hour meter in just a few
steps first you must select an hour meter, i ve made this diagram for my blog
